

ECO-FACTORY declaration

Internal ref. **KC2018-OUT169**

Based on the “high efficiency cogeneration” status (“CAR”) yearly recognized for the period 2012-2017 by the Competent Authority (G.S.E.), the gradual substitution of textile machines that is decreasing the specific electric consumption according to a dedicated project approved by GSE (in line with a study published by the Energy Agency E.N.E.A.), a significant improvement achieved in the compressed air production and in lighting,

the company V.M.C. S.r.l addressed in via Selvole 73A, Castel Goffredo (MN), Italy

has achieved a good energy efficiency in the context of textile production, as shown by the above mentioned achievements in the Italian legal framework, consistent with EU priorities, and can be considered an ECO-FACTORY concerning the cut of the energy usage and of carbon direct and indirect emissions.
